## SUMMARY

Frontend Developer with hands-on experience in building responsive web applications using React, JavaScript, and Tailwind CSS. Skilled in creating clean UI, integrating APIs, and deploying applications on Vercel and AWS S3. Passionate about learning modern frontend technologies.

## EDUCATION

### Master Of Computer Application

MET Institute of Management, Nashik

2024 – Present | Nashik, India

### Bachelor Of Computer Application

Sadguru Gadge Maharaj College, Karad, Satara.

2024 | Karad

8.35 CGPA

### HSC

Sadguru Gadge Maharaj College, Karad, Satara.

2021 | Karad

Marks: 77.33%

### SSC

Aanadaroa Chavan Vidyalaya Malkapur, Karad, Satara.

2019 | Karad

Marks: 75.20%

## SKILLS

### Frontend Development

HTML5, CSS3, JavaScript, React.js

### Styling & UI

Tailwind CSS, Bootstrap, Responsive Design

### Database

MongoDB, MySQL

### Tools & Deployment

Figma, Git, GitHub, npm, Vercel / Netlify, AWS S3

### Soft Skills

Teamwork, Problem Solving, Adaptability, Willingness to Learn, Hardworking.

## PUBLICATIONS

### "Implementation of a Smart Web-Based Platform for Tech-Driven Food Redistribution"

International Research Journal of Engineering and Technology (IRJET)

10/2025

## ACTIVITIES

Survey for NourishNow research project for collecting real time data

Role play as Volunteer in placement drive

Prepared summaries for multiple college guest sessions

## PROJECTS

### MetKickStart Placement Portal

A web-based application developed to track placement records and student data efficiently. The system allows uploading placement data, analyzing placed/unplaced students, total attendance, and roundwise results.

Technologies: Hostinger, React + Vite, Python (FastAPI), MongoDB

### AI Poem Generator

Developed an AI-powered web application that generates creative and meaningful poems based on user-provided topics, emotions, or keywords.

Technologies: React, Fast API

### Virallens

Developed an AI-driven dashboard that tracks, analyzes, and visualizes real-time social media trends across multiple platforms.

Technologies: React

### NourishNow

A web-based platform designed to reduce food waste by connecting hotels and restaurants with NGOs. The system allows hotels to list surplus food, which NGOs can request. Hotels can then approve these requests, ensuring safe and efficient food redistribution.

Technologies : Spring Boot, Angular 16, MySQL

### Water Park Ticket Booking System

Developed a desktop application to manage ticket reservations with features like booking, availability check, and payment tracking.

Technologies: ASP.NET with C#, SQL server

## CERTIFICATES

- AWS Essentials: A complete beginner's guide - Udemy
- Cloud Computing Mangement and Security - Softcroud Technology
- Full stack Java development course - Symbiosis
- One Day National Conference on Computer Science and Technology - Recent Trends

## AWARDS

Achieved 1st Rank in MCA First Year academic performance

Secured 1st Rank in College Outbound Event

Won 1st Rank in Ideathon 2024
